Introducing DT Webinars

Now that all schools and the College are live on Degree Tracker, we are shifting from the implementation phase to the maintenance phase, which will include updating and optimizing current plans, adding new plans, growing in the area of reporting, and modifying our educational programming. In that spirit, we are evolving the varied topic workshop-style DT Lab Sessions of the past into fixed topic seminar-style DT Webinars.

DT Webinar topics will be offered on a rotating basis every fall and spring semester, with occasional special topics as needed. DT Webinars are ideal for users with under one year of DT experience. We hope this regular, predictable rotation will assist departments in onboarding faculty and staff into new roles using DT.
